

Responds to questions on the partial migration Retain Listing As Is topic, as received by SBC from CLECs at the 4/18/01 CUF meeting held in Chicago

Questions	Reply
Change document – non listing to No Listing	document updated
Add definitions of non pub to the document	document updated
Add a column to the tables to reflect post conversion information to the document	document updated
Does AIT have sequence merge of caption listings	The Sequence Merge field on the DSR/DL/DSCR is not applicable in AIT
If there is no Sequence Merge, then is it up to SBC to decide if a caption should be put together in the directory	<p>The directory white page process automatically interfiles caption indents to the same Caption Heading. When the finding name (LNLN and LNFN) is the same on two transactions, the indented listing information will 'merge' together in the directory under the same name (heading)</p> <p>Example:</p> <p style="padding-left: 40px;">Transaction 1-CLEC A: ABC Company Sales</p> <p style="padding-left: 40px;">Transaction 2-CLEC B: ABC Company Service</p> <p style="padding-left: 40px;"><u>Directory Appearance will be:</u> ABC Company Sales Service</p>
Correct Scenario #6 to reflect retail and CLEC account to be non pub	document updated
Do the scenarios cover UNE listings as addressed in the Illinois order for Partial Migration Retain Listing As Is	The list of assumptions was revised to address the capability to retain listing as in on a partial migration of number portability and loop with number portability orders in the Ameritech region.
